

# Virtual Care | An Evolving Picture

# Virtual Care | Customize to Your Needs (Production Example)

				
Scale	Blood Pressure	Pulse Oximeter	Thermometer	Stethoscope

- Designed in partnership with large healthcare customer
- Each device supports biometric data pairing, which is integrated with customer custom app and overlaid to Pexip VMR
- Each device features managed care services
- Each device is cellular enabled
- Over 25,000 devices deployed to patient population in rural and urban areas

# Two Deployment Models – ONE Modernized Digital Infrastructure

## Customer-Managed Self-Hosted

] pexip[

Self-Hosted

- Corporate data center or cloud of choice
- Self-managed capacity
- Can register/manage SIP/H.323 endpoints (Cisco/Poly)
- Can optionally leverage Pexip Smart Scale for burst capacity to Pexip

## Dedicated Private Cloud

] pexip[

PPC

- Single Tenant – Customer Managed
- Pexip-Managed Infrastructure
- Can register/manage SIP/H.323 endpoints (Cisco/Poly)
- Maximizes Security and Scalability While being mindful of cost
- Reduce stress of managing multiple servers

# Enhanced Room Management

Reduce operational costs

Faster time to resolve issues

Proactive management of the service

Support users before and during a call

Maximise your investment
